ABOUT US

Đuro Đaković Special Vehicles Plc. is engaged in the production and maintenance of armored combat vehicles and demining machines.

Our company's portfolio consists of our own products, such as battle tank M-84 and two models of demining machines, as well as services that include maintenance, repair, overhaul and upgrades.

MISSION

The mission of our company is to develop quality and innovation in manufacturing, while maintaining market areas that support environmentally friendly systems.

VISION

Guided by the vision to become a leading manufacturer in the world, we aim to achieve the highest level of production quality.

M-84 MBT

As the OEM of M-84 MBT, Đuro Đaković has produced over 650 MBTs throughout the history, and has complete know-how for M-84 and T-72 family of tanks.

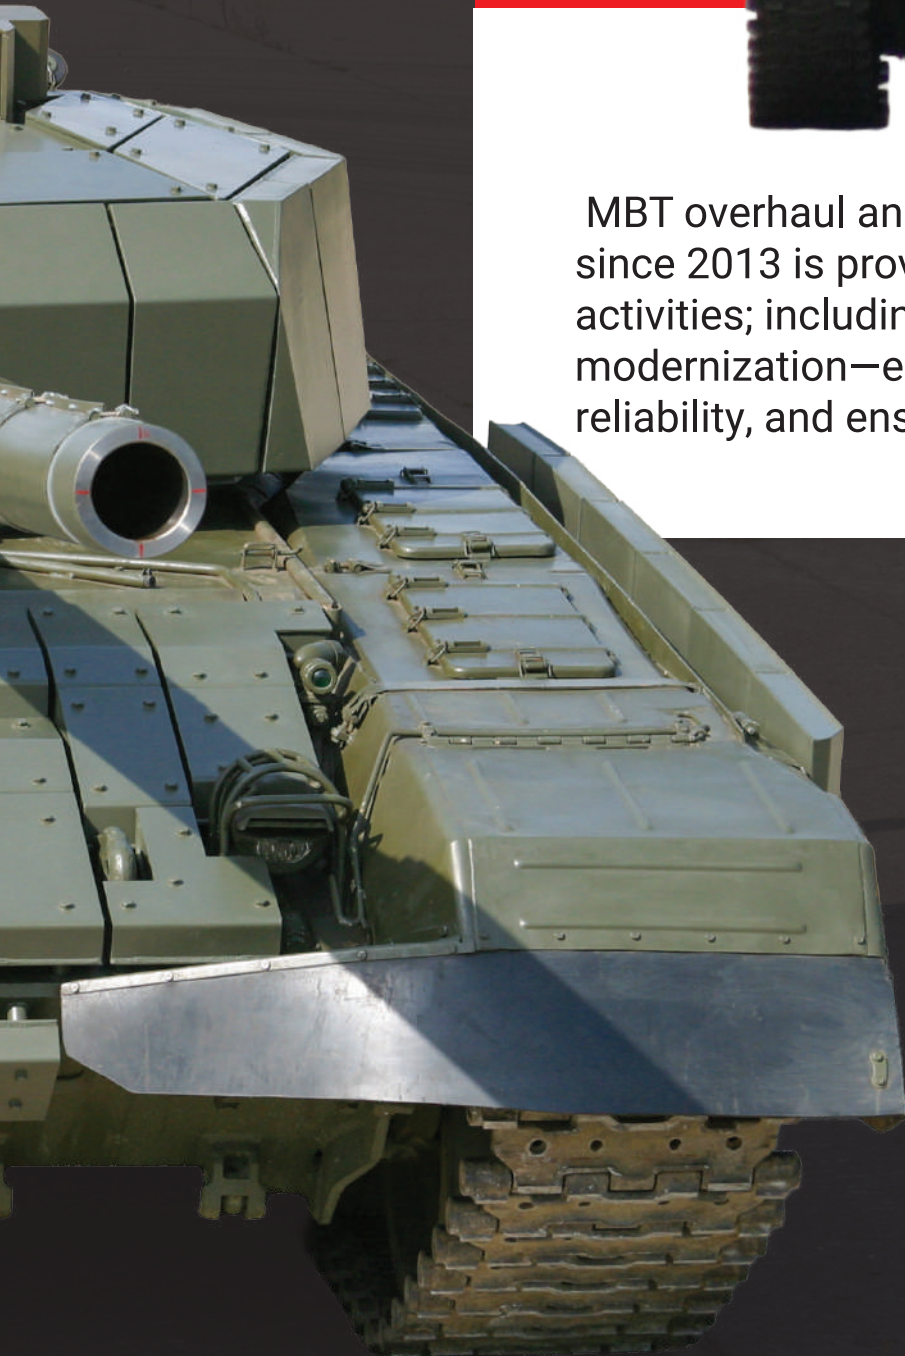

650+
MBT

MBT overhaul and maintenance line active since 2013 is providing full range of overhaul activities; including production and modernization—enhancing firepower, mobility, reliability, and ensuring NATO interoperability.

SINCE 2013

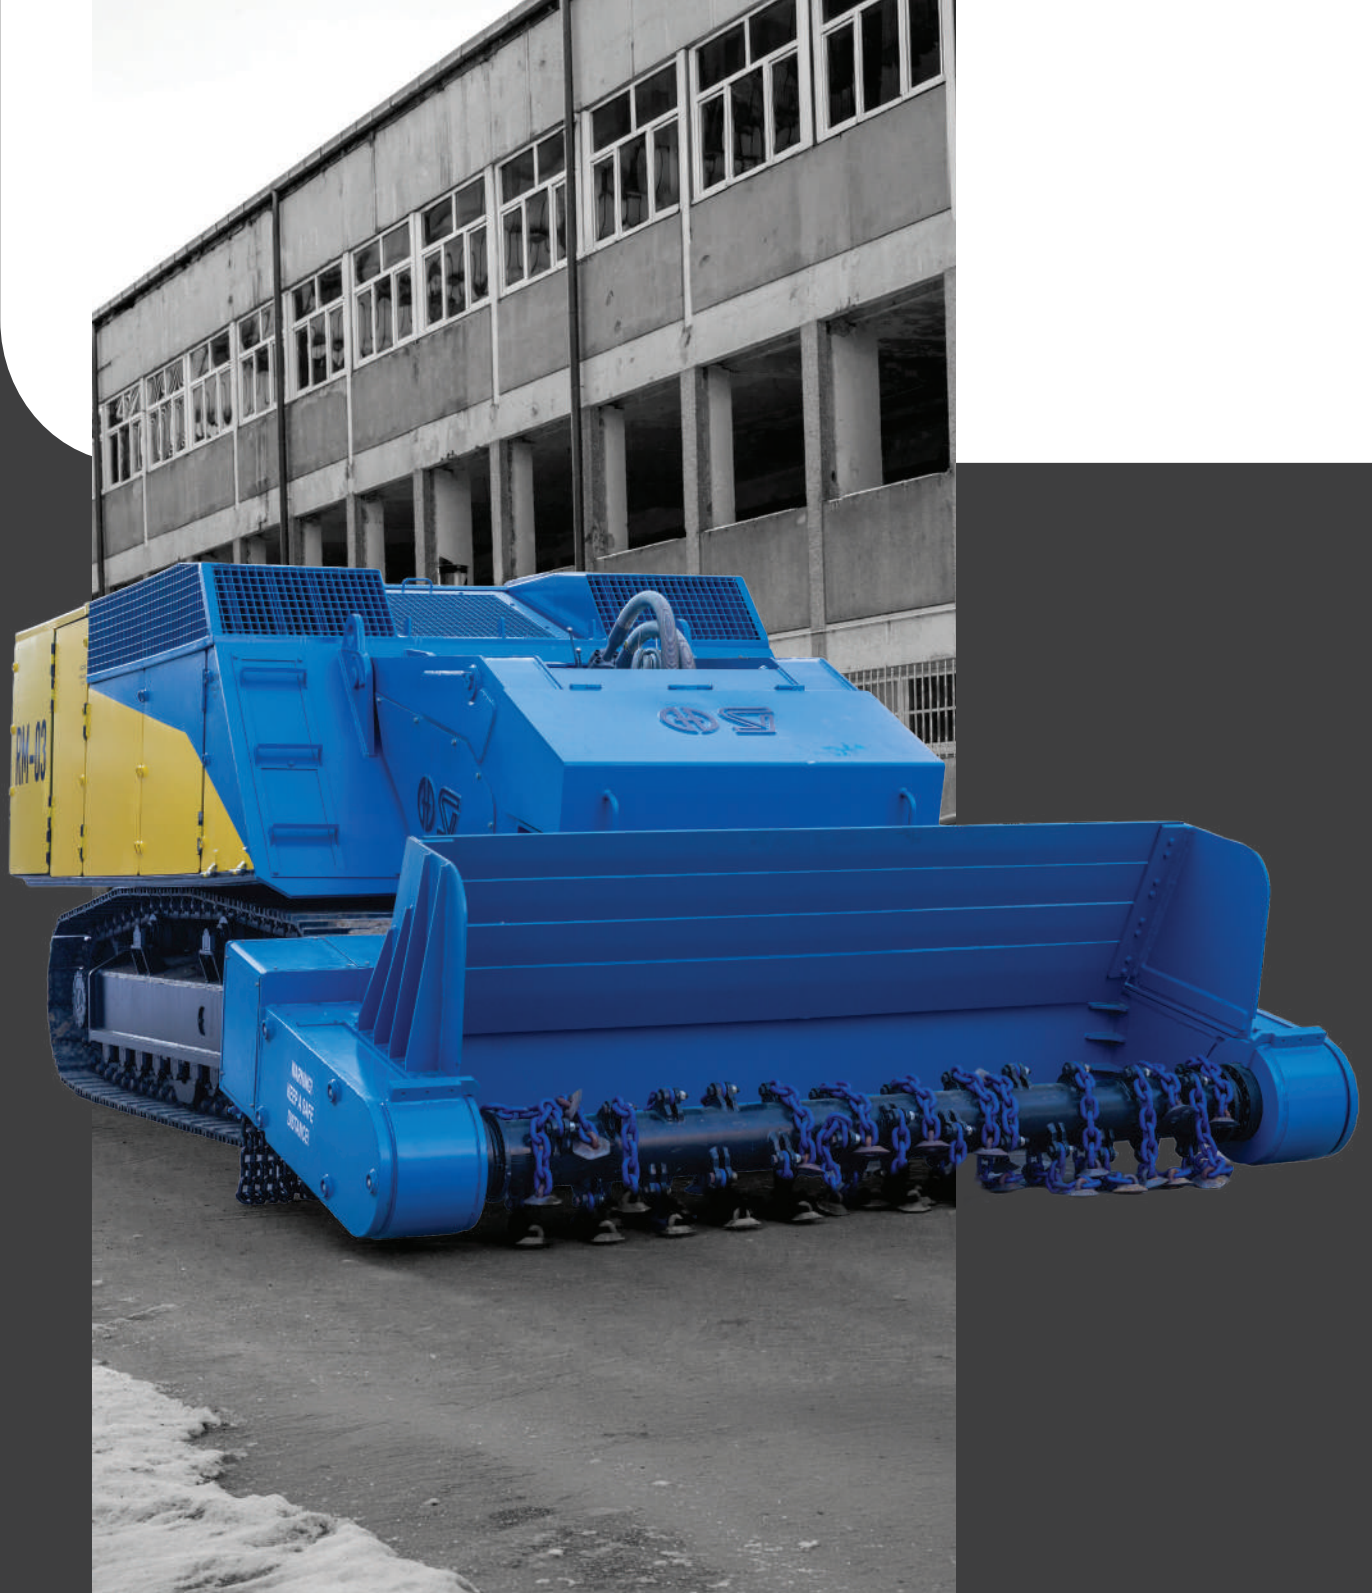

PATRIA AMV 8x8

Partnership with Patria (Finland) has resulted in awarding of OEM license for production of Patria 8x8 vehicles to Đuro Đaković.

Besides production of complete vehicles, Đuro Đaković is involved in production of vehicle components and subsystems, as well as providing long-term lifecycle support.

DEMINING MACHINES

Designing and producing the first remote-controlled demining machine in the end of 1990s marked the start of Đuro Đaković's 30-years tradition in this challenging area.

All Đuro Đaković's demining machines follow the same principles of heavy-duty, simple, robust and reliable machine providing superb power and performance in the mine field. Active RM-KA-02A (medium category) and RM-03 (heavy category) models incorporate modern, top-of the line components with well-proven base design.

MROU

Đuro Đaković's tradition in maintenance of defence vehicles and systems originates from the very beginning of production of M-84 MBTs, which was immediately followed by providing of full lifecycle support for those tanks. Today, Đuro Đaković is the main partner of Croatian Ministry of Defence for maintenance of land forces' equipment.

TOWED GUNS

Đuro Đaković's ongoing activities in refurbishment of towed guns ranging from 105 to 155 mm include maintenance, repair and modifications.

SELF-PROPELLED HOWITZERS

MROU of vehicular part of the system (tracked or wheeled), gun, hydraulic recoil mechanism, loaders, and supporting systems.

MLRS

Providing services in MROU of automotive part of the system, mechanical and electrical part of the launcher, with optional upgrade and automatisisation of the launch control and/or targeting system.

MRAP VEHICLES

Maintenance, repair, upgrades, integrations and equipping of MRAP and similar types of wheeled vehicles.

BRADLEY FIGHTING VEHICLE

Active workshop for refurbishment of Bradley M2A2 ODS vehicles, in cooperation with vehicle OEM - BAE Systems, as well as maintenance of BFVs for the local user puts Đuro Đaković of selected companies with such capabilities.

KINDROVO TEST AND TRAINING FACILITY (KTTF)

KTTF is a factory owned proving ground with over 40 years of testing experience. Designed for both tracked and wheeled platforms, it provides testing and training in an environment that replicates real world terrain conditions.
